

Sustainability & Environmental Policy

Introduction

Tables for Business is committed to incorporating sustainability into its actions and practices as part of its responsibility to the community and the environment.

Our Business and Supply Chain

We want to have a positive impact on the planet. That is why we are continuing to source our materials and components responsibly while continuing to develop our knowledge of innovative green technologies and materials we may be able to adopt.

All our timbers are sourced responsibly from Forest Stewardship Council (FSC) managed forests that provide environmental, social, and economic benefits dedicated to protecting forests.

Our products are wrapped and protected in fully recyclable materials including but not limited to cardboard boxes, brown paper and plastics that are managed correctly by our dedicated delivery and fitting teams.

Tables For Business continued to make every effort to consolidate all deliveries to reduce our overall carbon output in relation to transporting goods and services on our behalf.

We are always looking for ways to improve and reduce our ecological footprint along with our community and understand our duty to act and educate our business and supply chain accordingly.
